

"Affording people a smoother renovation journey with guidance, follow-up and digital tools"

MORE INFO AT
WWW.TURNKEY-RETROFIT.EU

The project

- Turnkey Retrofit responds to the challenge of renovating the EU building stock which represents an exceptional investment opportunity with the capacity to **boost the economy** and generate local jobs.
- Developing one platform, building on existing services and business models, to **make the renovation process easier for homeowners**.
- **9 partners** are joining forces to develop the concept in 3 countries: Spain, France, Ireland. If successful, the service-oriented model will be **replicated EU-wide**.

Objectives

- **Homeowners' increased awareness** and facilitated access to national and local financial support schemes.
- An **improved offer** by trustful market operators and streamlined standards and practices into consistent and transparent processes investors can rely on.
- **Decreased total renovation implementation costs** and minimised unexpected costs
- The provision of **additional services** that go beyond energy renovation (home improvement and arrangement, home solutions to improve comfort, security and quality of life).

Solutions4Renovation

An **integrated home renovation service** supporting homeowners with a turnkey solution for:

- Information about their home
- Potential works
- Contact with providers and installers and contracting of works
- Structuring and provision of financial incentives
- Monitoring / onsite coordination of works and quality assurance
- Commissioning and post-assessment of the works and of building performance

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 839134.
